Warehousing

Lexington Kentucky is located in the transportation center of gravity for almost every product sold in the Eastern United States. You couldn't have a better location to assemble, store or distribute your products.

Blue Grass Manufacturing Company has warehouse space available in its 100,000 Square Foot building on Jingle Bell Lane in Lexington near the intersection of I-75 and I-64. We have made arrangements in the surrounding area for additional or over flow space. Our space is heated with economical gas radiant heat and is 100% sprinkled. Ample utilities plus compressed air are available. The building is zoned I1 so most any activity is permitted.

If you desire support services, we offer receiving, shipping, storage, inventory control, final configuration assembly or anything special you need. Ask and we can handle your order entry, fulfillment, and invoicing, and even service your returns.
